### THE PLOMB GUARANTEE

Plomb Tools are forged from the finest steels, scientifically heat-treated. They are guaranteed to perform the work for which they are designed and intended to be used, and to last as long as is consistent with ordinary wear and tear. Any Plomb Tool that may be found defective in workmanship or material, and is returned to the factory, charges prepaid, will, at our option, be replaced, or repaired, or credited at current prices.

### PAGE OMISSIONS

Pages 3-14, 20-23, 43, 44, 52 and 53 are not included, due to necessary revisions. The pages were not re-numbered consecutively, without omissions, because the page numbers in Plomb's price lists apply to the 19-R Catalog, First Printing, and it was desirable to have the same index apply, as completely as possible, to this Third Printing.

## TOOL SET NO. 9900A FOR WAR VETERANS

No.	Description
<b>Punches and Chisel</b>	
41-3/8	Center Punch, 4-7/8" Long
47-5/16	x1/8 Pin Punch, 5-1/4" Long
50-5/16	Starting Punch, 1/8" Point
86A-1/2	Cold Chisel, 5/8" Cut
<b>Pliers</b>	
206	Diagonal Cutting, 6" Long
235	Slip Joint Ignition, 4-1/2" Long

No.	Description
240	Slip Joint Water Pump, 9-1/2"
276	Combination Slip Joint, 6"
<b>Wrenches</b>	
1212	Comb. Box & Open End, 3/8"
1214	Comb. Box & Open End, 7/16"
1216	Comb. Box & Open End, 1/2"
1218	Comb. Box & Open End, 9/16"
1220	Comb. Box & Open End, 5/8"
1222	Comb. Box & Open End, 11/16"

No.	Description
1224	Comb. Box & Open End, 3/4"
1228	Comb. Box & Open End, 7/8"
3021	Open End, 3/8" and 7/16"
3026	Open End, 1/2" and 9/16"
<b>1/4" Drive Sockets and Attachment</b>	
4708	Socket, 6-Point, 1/4" Opening
4708S	Socket, 8-Point, 1/4" Opening
4710	Socket, 6-Point, 5/16" Opening
4710S	Socket, 8-Point, 5/16" Opening
4769	Spintype Handle, 6" Long
<b>3/8" Drive Sockets and Attachments</b>	
5200N	Socket Set (See Page 27)
5254	Adapter, 1/2" Female, 3/8" Male
5275	Univ. Socket, 12-Pt., 1/2" Op.
5276	Univ. Socket, 12-Pt., 9/16" Op.

<b>1/2" Drive Sockets and Attachments</b>	
5400NR	Socket Set (See Page 31)
5343	Deep Socket, 12-Point, 5/8" Op.
5345	Deep Socket, 12-Point, 3/4" Op.
5347	Deep Socket, 12-Point, 13/16" Op.
5348	Deep Socket, 12-Point, 7/8" Op.
5436	Socket, 12-Point, 1-1/8" Op.
5440	Socket, 12-Point, 1-1/4" Op.
5470	Universal Joint
5480	Speed Handle, 18" Long
<b>Screwdrivers</b>	
9622	5-1/4" Long, 1/8" Bit
9704	9" Long, 9/32" Bit
9784	8-7/8" Long, Phillips #2 Bit
9806	10-1/2" Long, 11/32" Bit

## MASTER TOOL SET NO. 9900B FOR WAR VETERANS

No.	Description
<b>Feeler Gauge Set and Offset Screwdriver</b>

## **COMPLETE TOOLMOBILE**

### *"The Modern Mobile Work Bench"*

Here's the finest tool box your money can buy. It's convenient and impressive—tops for efficient operation. One piece construction with all parts joined by spot welding. Chest 29½" high without castors or piston rack. 28" wide, 17¾" from front to back. Lustrous chinese red enamel finish. Weight complete, without tools, 119 pounds, boxed for shipment. Strong as a steel safe. A Plomb Toolmobile saves hours of time and effort. The most popular roller box on the market.

#### **SPECIFICATIONS**

- (1) Bolted on rack, has 16 holes and 8 slots for pistons, valves, and tools.
- (2) Large working surface 17¾" x 28"
- (3) Barrel lock with locking bar secures everything with one key. Locking bar drops in slot at left out of way when chest is not in use.
- (4) Side rail on each side for socket rack.
- (5) Drawer 3¾" deep, complete with adjustable divider.
- (6) Drawer—5⅞" deep, with adjustable divider.
- (7) Drawer—6⅝" deep. Solid bottom.
- (8) Large compartment 10" high. Front panel slides under drawer above.
- (9) Ventilators on both sides.
- (10) Rounded Streamlined corners.
- (11) Large composition, ball bearing castors. Front castors with foot operated brakes.
- (12) 6" x 6" steel reinforcement plate under top for attaching light bolt on vise.
- (13) All corners reinforced on inside for added strength and rigidity.
- (14) All drawers run on bearing rollers.

**9969-7** Piston Rack for Toolmobile.  
Weight, 6 lbs.

**9969-4** Toolmobile less Piston Rack.

**No. 9969-1 TOOLMOBILE with Piston Rack**

**No. 9969-1 TOOLMOBILE Open**

## **No. 5894—Extra-Heavy-Duty Box**

5" deep, 8 $\frac{1}{4}$ " wide and 30" long, inside dimensions, to fit the Extra-Heavy-Duty handles and sockets described on page 52. Also used for large Heavy-Duty sets, with  $\frac{3}{4}$ " square drive, especially with the larger sockets. Made extra-heavy throughout, welded, riveted and strongly reinforced. Weight, 28 lbs.

No. 5894

## **No. 5695—Heavy-Duty Tool Box**

For Heavy-Duty Socket Sets with  $\frac{3}{4}$ " drive. Lid reinforced with steel cross-ribs. Handle, on top of lid, folds flush into recess. Three compartments, as shown, just right for heavy-duty sockets and handles. Double-hinged; locks with two spring hasps. 3 $\frac{3}{4}$ " deep, 8" wide, 22 $\frac{1}{2}$ " long, inside measurements; weight, 8 $\frac{1}{4}$  lbs.

No. 5695

## **No. 5495—Standard Tool Box**

A heavy-gauge steel box with socket compartment lengthwise of box, and compartment at front for extra sockets, cotter keys, small tools, etc. Clips inside top for speeder handle. Hooked staple holds cover down tight. Handle folds out of way when not in use. 1 $\frac{3}{4}$ " deep, 8 $\frac{1}{4}$ " wide, 19" long. Red baked enamel finish. Wt. 5 $\frac{1}{4}$  lbs.

No. 5495

## **No. 5496—Box 5495 and Socket Rack 5497**

### **No. 5295—Cub Tool Box**

A convenient small box, 1 $\frac{1}{2}$ " deep, 4 $\frac{1}{4}$ " wide, 18 $\frac{1}{2}$ " long. Handy for trouble-shooting, as it is a convenient size to carry. Wt. 2 $\frac{1}{2}$  lbs.

## COMBINATION 1/4", 3/8" AND 1/2" SQ. DRIVE SOCKET SET

9980AA

### 9980 AA SET

This popular basic three-drive socket set combines Plomb's 1/4" Drive Set 4700B, 3/8" Drive Set 5200AA and 1/2" Drive Set 5400AA in Tool Chest 9980.

Items for 1/4" drive include a metal box, reversible ratchet, spintype handle, sliding bar, 6-point sockets with 7/32", 1/4", 9/32", 5/16", 11/32", 3/8" and 7/16" openings, and 8-point sockets with 1/4" and 5/16" openings.

Items for 3/8" drive include a reversible ratchet, hinge handle, speed handle, 3 1/2" and 12" extensions, universal joint, and 12-point sockets with 3/8", 7/16", 1/2", 9/16", 5/8", 11/16" and 3/4" openings.

Items for 1/2" drive include a reversible ratchet, hinge handle, speed handle, 5" and 10" extensions, universal joint, and 12-point sockets with 7/16", 1/2", 9/16", 5/8", 11/16", 3/4", 13/16", 7/8", 15/16" and 1" openings.

## 1/4" SQUARE DRIVE SOCKET SETS

Here are five complete sets of handy, midget tools, designed for all kinds of light work where small nuts and bolts must be turned. All sets include a useful selection of basic tools to which you can add others as your needs require.

4700B

4700F

### 4700B SET

- 4707 Socket, 6-Point, 7/32" Opening
- 4708 Socket, 6-Point, 1/4" Opening

## 5447 Ratcheting Attachment— $\frac{1}{2}$ " Sq. Drive

Converts any  $\frac{1}{2}$ " drive non-ratcheting handle or attachment into a ratcheting device. Used mainly with a hinge handle, hinge handle plus extension, speed handle or torque wrench. A simple, positive device, huskily built for high torque strength yet compact for ample clearance. Has very little backdrag.

Ratchet has 34 teeth, providing positive engagement every  $10\frac{1}{2}$  degrees. Reversing lever acts directly on pawl, eliminating separate cam mechanism and possible misalignment and malfunction. Lever is well protected from damage or unintentional reversal.

THE PLOMB LINE IS THE SURE LINE FOR COMPLETE SATISFACTION

## Standard Sockets and Attachments— $\frac{1}{2}$ " Drive

### 5449 REVERSIBLE RATCHET.

The strongest, lightest and thinnest ratchet made. Reversible at a flip of the lever. Length  $10\frac{1}{4}$ ". Wt.  $1\frac{1}{2}$  lbs.

### RATCHET PARTS.

- 5449C Cover
- 5449DL Dog, Left
- 5449DR Dog, Right
- 5449H Cover Screw
- 5449R Rev. Assembly
- 5449S Spring
- 5449W Wheel with Plug

### THE HINGE HANDLE.

Three for you to choose from. All upset knurled handles drilled with pinhole. Slender shanks, lightness and balance.

5466  $9\frac{1}{2}$ " LONG, WEIGHT  $\frac{3}{4}$  lb.

5467 15" LONG, WEIGHT  $1\frac{1}{4}$  lb.

5468 18" LONG, WEIGHT  $1\frac{3}{4}$  lb.,

### 5300PH PIN HANDLE

For deep sockets. 8" long.

### 5466PH PIN HANDLE.

A handy little bar to be used with any Plomb extension or hinge handle.  $11\frac{1}{2}$ " long,  $\frac{1}{2}$ " stock.

### 5485 THE SLIDING BAR.

Friction Ball Hold Plug in any position. Used as a "T" or offset handle. 14" long, weight  $1\frac{1}{4}$  lb.

### 5486 THE ELL HANDLE.

Where real leverage is required the ell handle is tops. 14" long, weight  $1\frac{1}{4}$  lb.

### PLOMB TORKERS

Featuring 2-Way Drive,  $\frac{1}{2}$ " connections with Floating Handle. No moving parts to break or get out of commission. Accuracy assured.

5401—Calibrated up to 50 foot pounds.

5402—Calibrated up to 100 foot pounds.

5403—Calibrated up to 150 foot pounds.

## **PLOMB ADAPTORS**

5254

Increase the range of your Cub and Standard Sets with Plomb Adaptors. Makes it possible to use Cub Sockets with Standard Drive Attachments and vice versa. The same is true with your Heavy Duty Sets too. See Pages 36-39.

5253 1/2 Sq. Male x 3/8 Sq. Female  
5254 3/8 Sq. Male x 1/2 Sq. Female

5453 1/2 Sq. Male x 3/4 Sq. Female  
5053 3/4 Sq. Male x 1/2 Sq. Female

5253

### **DRAG LINK SCREW DRIVERS.**

Many uses especially on any large slotted screws and used with most 1/2" drive attachments.

5444 Bit 3/4" Wide, Length 1 1/16".

5446 Bit 1" Wide, Length 1 1/16".

### **PLOMB EXTENSIONS.**

Increase to a wider range the use of your sockets and attachments. Each Plomb extension drilled with hole for pin handle except No. 5460.

5460 2 1/2 INCH EXTENSION.

5461 5 INCH EXTENSION.

5463 10 INCH EXTENSION.

5464 18 INCH EXTENSION.

### **SPEED HINGE HANDLE.**

Combines the features of a speeder and hinge handle. Ball bearing grip. 7" Dia. Swing.

3/16" Stock 16" Long, Wt. 1 3/4 lb.

### **UNIVERSAL JOINT.**

Nothing makes your work easier than a Universal Joint when working at some difficult angle.

### **SPEED HANDLES.**

Nothing finer than these Ball Bearing Speeders for really speeding nuts on or off.

5480 18" Long 1/2" Stock, Ball Bearing, Knurled Grip 4" Throw.

## Extra Heavy Duty--1" Square Drive

### Extensions

Extensions make it possible to get into those hard-to-reach places. Used with every attachment and socket on this page.

#### 5861—9" EXTENSION

1" square connections. Female end drilled for 1" bar. Friction ball holds bar firmly at any point. Wt. 2½ lbs.

#### 5863—18" EXTENSION

Same specifications as No. 5861. Wt. 4½ lbs.

#### No. 5868—HINGE HANDLE

You will find this the handiest tool for nut turning you ever used. 26" long, 1⅝" diameter handle, knurled grip. 1" male connection. Wt. 8½ lb.

#### 5884—1" BAR

This handy bar is used to turn the Big Plomb Sockets which are drilled with a hole to fit this bar. Used as a Handle to make a T drive with Plomb extensions. 24" long. Equipped with spring ball stop on one end. Wt. 5¼ lbs.

#### 5885—SLIDING PLUG

Used with No. 5884 Bar as Sliding Bar Handle. Has friction ball to hold it firmly at any point on bar. Wt. 1¼ lbs.

### Adaptors

Adaptors increase the range of your tools. They make it possible to use ¾" Drive

Sockets with these 1" drive attachments or the 1" drive sockets with your ¾" drive attachments.

5853—1" square male by ¾" square female.

5854—¾" square male by 1" square female.

### EXTRA HEAVY-DUTY SOCKETS

Big, sturdy sockets that can take real rugged punishment. Bell shaped for lightness. Each socket drilled with hole so they can be used with sliding bar handle.

THE PLOMB LINE IS THE SAFE LINE FOR ALL MECHANICS

## CUB POWER SOCKETS

### $\frac{3}{8}$ " SQUARE DRIVE

Plomb power sockets are noted for outstanding performance on the production lines of leading automobile manufacturers and hundreds of other plants.

Selected steels contribute strength and toughness to these power sockets. Advanced design provides sockets with strong walls, maximum clearance for speed and ease in handling, snug fit and freedom from slipping. All of these features combine to give these sockets long life and a high safety factor.

Plomb power sockets are made to fit most common types of power nut-running equipment, and they can be adapted to many other power tools. Note the wide variety in opening sizes and types which assures the right socket for every need.

## STRIKING WRENCH

*An Original Plomb Development!*

Pat. Pend.

Striking Wrenches are equipped with square striking shank for use in restricted quarters with a hammer. They are offset to allow maximum clearance. Oxidized Blue finish. Made from Alloy Steel.

Plomb Industrial Slugging Wrenches are designed for all types of heavy industrial work where the working space is extremely limited or highly congested. The 12 point opening fits snugly upon the bolt or nut and will remain in position while being struck with heavy hammer or sledge.

This wrench has been a boon to shipbuilders, installing or repairing machinery in ships, diesel power plants, railroad repair shops, oil refineries or any place where heavy machinery is located.

**THE PLOMB LINE IS THE ENGINEERED LINE FOR GREATEST EFFICIENCY**

Patent Pending

## Extra Heavy Duty Double End Box Wrenches

Superior design, masterful forging, have made these Plomb Box Wrenches the preference of Industry. These wrenches are made stronger in the neck, or offset, but done without increasing thickness between the broached opening and the under side of the offset. The crescent shaped neck section is not only stronger but will work in closer places. High pressure flanges and castings with ribs or bosses adjacent to bolt holes are examples of work where minimum rear wall thickness is invaluable. Safety Engineers whole-heartedly endorse these wrenches.

Patent Pending

## Extra Heavy Duty Box and Spud End Wrench

You will note a new innovation in this wrench, as Plomb has introduced a real safety factor. It is a combination box wrench with tapered spud handle. It will help you make quick work of loosening frozen or corroded bolts or nuts. The spud end is very handy for aligning holes in flanges. Note in particular the clearance provided by the offset head which overcomes the usual clearance problems. These wrenches are ideal for construction work, oil refineries, etc.

## POPULAR SETS OF 15° BOX WRENCHES

**1100 BA**

Here is a fine basic set of four box wrenches to which you can add more sizes as needed. All of the wrenches in this set are in the most-used range of sizes. Contents follow: No. 1120, 5/16"x3/8"; No. 1125, 7/16"x1/2"; No. 1126, 1/2"x9/16"; No. 1131, 5/8"x3/4". Packed in cardboard box.

This large master set leaves little to ask for in an all-around assortment of Plomb's famous line of Double End Box Wrenches. 10 Wrenches that will give you opening sizes to fit most any nut or bolt that comes along. Specifications follow: No. 1120, 5/16"x3/8"; No. 1122, 3/8"x7/16"; No. 1125, 7/16"x1/2"; No. 1126, 1/2"x9/16"; No. 1130, 9/16"x5/8"; No. 1131, 5/8"x3/4"; No. 1135, 11/16"x3/4"; No. 1140, 13/16"x7/8"; No. 1145, 15/16"x1"; No. 1150, 1-1/16"x1-1/8"; No. 2413, Kit. Wt., 4 lbs.

**1100-F**

**1100-H**

You can't afford to be without this very popular set of Plomb Double End Box Wrenches. 7 wrenches without a duplication in the 14 assorted opening sizes. Contents are: No. 1120, 5/16"x3/8"; No. 1125, 7/16"x1/2"; No. 1130, 9/16"x5/8"; No. 1135, 11/16"x3/4"; No. 1140, 13/16"x7/8"; No. 1145, 15/16"x1"; No. 1150, 1-1/16"x1-1/8"; No. 2406, Leatherette Kit. Wt., 3½ lbs.

Cannot be shipped complete from factory but can be assembled by distributor.

## Combination Box and Open-End Wrenches

Both openings same size, Box End offset 15°:  
Open End 15° Angle.

The Combination Open End and Box Wrench was first introduced to the American trade by the Plomb Tool Company—a wrench that has proved to be the most popular innovation in wrench manufacturing in a long time. You will note that both openings are the same size. The Box Wrench has always been famous for its safety features,—the Open End for its speed. Here you have in the one wrench the combination of both. Use the Box end for breaking loose or cinching,—the Open end for running the nut on or off.

No.	Both Openings	Overall Length	Box Head Thickness	Open Head Thickness	U.S.S. Bolt Size	S.A.E. Bolt Size	Amer. Std. Bolt Size	No.

## 15° OPEN END WRENCHES

**“The Pride Line”**

### COMPARISON SHOWS PLOMB ADVANTAGES

Shown at the right is an ordinary open-end wrench (A) and an open-end wrench built the Plomb way (B). Compare the two. The special engineering and finest alloy steel used in the Plomb wrench result in one that's stronger, and easier and faster to work with. (1) Less overhang in opening. (2) More accurate fit. (3) Smaller, more compact head. (4) Slender shank with rounded edges as compared to thick sharp edged shank.

## FLARE NUT WRENCHES

Designed to meet the rigid requirements of the U.S. Army Air Forces and the U.S. Navy.

The primary use of the flare nut wrenches is in the assembly and maintenance of all types of lines, including fluid, air, gas, etc. It has a wide variety of applications in aviation, automotive, air conditioning fields, and refrigeration, as well as on such equipment as compressors and various pressure instruments. As illustrated, the head is flat and based on a modified 12 point design, with an opening which allows access to the fitting around tubing. The possibility of damage to the fitting is remote, because the wrench has better contact with the nut and cannot slip and chew it.

PART NO.	A SIZE OPENING	B CLEARANCE	C OUTSIDE DIA.	D OVERALL LENGTH	E HEAD THICKNESS

Gasket Scrapers

## PLOMB STUD PULLERS

### ← New Detachable Wedge Type

Latest development in stud pullers. No. 4515 for  $\frac{1}{4}$ " to  $\frac{5}{8}$ " studs; No. 4532 for studs from  $\frac{5}{8}$ " to 1" turns in a smaller circle and will work much closer to obstructions.

Set-screw in side of stud puller prevents loss by keeping wedges in body when not in use.

No. 4515 is 1-3/16" in diameter, 3 1/2" long and has 1/2" square service connection.

No. 4532 is 2 1/8" in diameter, 5 1/2" long, and has 3/4" square service connection.

Both sizes will take the longest studs.

### Standard 1/2" Square Drive

No.	Description	Wt. lbs.
4515	Stud Puller Complete with 4516 and 4517 Wedges; Capacity, $\frac{1}{4}$ " to $\frac{5}{8}$ " Studs.....	1 1/4
4516	Thick Wedge, Capacity $\frac{1}{4}$ " to $\frac{1}{8}$ ".....	
4517	Thin Wedge, Capacity $\frac{1}{2}$ " to $\frac{5}{8}$ ".....	

### Heavy Duty 3/4" Square Drive

4532	Heavy Duty Stud Puller, with 4533 and 4534 Wedges; Capacity $\frac{5}{8}$ " to 1" Studs.....	4 1/2
4533	Thick Wedge, Capacity $\frac{5}{8}$ " to $\frac{3}{4}$ ".....	
4534	Thin Wedge, Capacity $\frac{3}{4}$ " to 1".....	

### Adjustable Ring Groove Cleaners

No. 2311—Cleans  $\frac{3}{32}$ ",  $\frac{1}{8}$ ",  $\frac{5}{32}$ " and  $\frac{3}{16}$ " grooves with single tool. 4-way cutter is finest alloy steel. Can be resharpened with file. Complete with cutter. No. 2312—Extra Cutter.

No. 2335—An inexpensive new valve guide cleaner that is adjustable, by simply turning nut, to all sizes of valve guides. Length, 9 3/4".

No. 2337—The 10 flexible blades of round spring steel. Sliding band regulates flexibility of edge. 1" wide, 9" overall length.

No. 2336—Has many uses, such as scraping carbon, cutting wood, removing shellacked gaskets. Blade 1 1/2" wide; overall length, 11 1/8".

## Feeler Gauges - Accurately Ground, Correctly Heat Treated

### Standard Thickness Gauges

No. 000A—Set of the following 9 gauges, one each: Nos. 003, 004, 005, 006, 008, 010, 012, 015 and 018, in No. 000C Holder.

No. 000C—Holder only, without blades.

No.	Blade Thickness	Width Blade	Length Blade
0015	.0015"	1/2"	3 1/4"
003	.003"	1/2"	3 1/4"
004	.004"	1/2"	3 1/4"
005	.005"	1/2"	3 1/4"
006	.006"	1/2"	3 1/4"
007	.007"	1/2"	3 1/4"
008	.008"	1/2"	3 1/4"
009	.009"	1/2"	3 1/4"
010	.010"	1/2"	3 1/4"
011	.011"	1/2"	3 1/4"
012	.012"	1/2"	3 1/4"
013	.013"	1/2"	3 1/4"
014	.014"	1/2"	3 1/4"
015	.015"	1/2"	3 1/4"
016	.016"	1/2"	3 1/4"
018	.018"	1/2"	3 1/4"
020	.020"	1/2"	3 1/4"
022	.022"	1/2"	3 1/4"
025	.025"	1/2"	3 1/4"
030	.030"	1/2"	3 1/4"
032	.032"	1/2"	3 1/4"
035	.035"	1/2"	3 1/4"
040	.040"	1/2"	3 1/4"

### Step-Cut Feeler Gauges

Each Blade has two different thicknesses, carefully ground and exactly true. A quality far superior to those usually offered to the trade; heat-treated to remain true after long use.

No.	Thicknesses	Width Blade	Length Blade
004/6	.004"—.006"	1/2"	3 1/4"
005/7	.005"—.007"	1/2"	3 1/4"
006/8	.006"—.008"	1/2"	3 1/4"
007/9	.007"—.009"	1/2"	3 1/4"
008/10	.008"—.010"	1/2"	3 1/4"
009/11	.009"—.011"	1/2"	3 1/4"
010/12	.010"—.012"	1/2"	3 1/4"
011/13	.011"—.013"	1/2"	3 1/4"

No. 000B—Set of 4 Step-Cut Gauges: Nos. 004/6, 006/8, 008/10, 010/12, with No. 000C Holder.

No. 000C—Holder only.

### No. 000E—Brake Gauge Set

(Blades not sold separately)

Consists of 9 blades, 3/16" wide by 4" long, of the following thicknesses: .006", .008", .010", .012", .014", .016", .018", .020" and .025".

### Feeler Gauges in 12" Strips

No.	Blade Thickness	Width Blade	Length Strip
0015L	.0015"	1/2"	12"
002L	.002"	1/2"	12"

## Feeler Gauge Sets

**No. 000H**—Plastic container with 003, 004, 005, 006, 008, 010, 012, 015 and 018 short feeler gauges.

**No. 000F**—Short plastic container only.

**No. 000J**—Plastic container with 0015L, 002L, 003L, 004L, 005L, 006L, 008L, 010L, 012L, 013L, 015L and 018L long feeler gauges.

**No. 000G**—Long plastic container only.

## No. 2135—Adjustable Bending Bar

An efficient bending tool with a multitude of applications. Ideal for compressing springs, straightening frames, and for bending bumper brackets, frame horns, conduit, pipe and even heavy plate. Adjustable to more than 100 positions. Length, 36".

## HACKSAWS

### No. 344—Low-Clearance Hacksaw

For places where a high-frame hacksaw won't work. Takes 10" blades.

### No. 351—Adjustable Hacksaw

A well-built saw with many fine features. Swivel locks blade at any angle. Inverted handle is molded to fit hand. Blade slides up legs for use in close places. Takes 8", 10" or 12" blades.

### No. 360—Adjustable Hacksaw

Inexpensive, but sturdy and serviceable. Has pistol grip handle.

## Bars

### Conventional Type Garage Bars

No.	Octagon Stock	Length	Weight
2116	1 1/2"	16"	3/4 lb.
2120	5/8"	18"	1 1/2 lbs.
2124	3/4"	24"	2 3/4 lbs.

### Rolling Head Bars

New type Gear Bar, with 90° rolling head, is especially valuable for getting into close places behind gears, etc.

No.	Octagon Stock	Length	Weight
2126	1 1/2"	16"	3/4 lbs.
2130	5/8"	18"	1 1/2 lbs.

### No. 8—Ripping or Wrecking Bars

No.	Stock	Length	Wt. lbs.
* 8	5/8"	18"	1 3/4
8	5/8"	21"	2
* 8	3/4"	24"	3 1/2
8	3/4"	30"	4 1/4
* 8	7/8"	30"	5 3/4

\*Temporarily discontinued

### No. 2110—Grease Bar

Wrench like opening offset to clear obstructions and with coarse teeth to prevent slipping. 28" long. Weight 3 3/4 lbs.

## **Announcing Plomb's Expanded Line of PLIERS and ADJUSTABLE WRENCHES ... and a New Line of PIPE WRENCHES**

Acquisition of another factory enables Plomb to offer a comprehensive line of pliers, adjustable wrenches and pipe wrenches. Among the many styles and sizes now available, you can find the right ones for any job. And you are assured of the same high quality found in all Plomb Tools.

### **PLOMB PLIERS**

Skilled workmen, with the aid of fine equipment, forge and machine these pliers to high standards. Long life is insured by their sturdy construction and by the use of fine high-grade steels.

When you examine these pliers you will find many superior features — the result of years of experience in plier design. They are easy to work. They have good balance —

good feel. They have correct leverage. Gripping teeth are shaped properly. Honed cutting edges are perfectly matched. Patterned handles are shaped to fit the hand, giving a sure grip.

All pliers have polished heads and gun-metal handles — the finish found on high-grade pliers for professional use.

201-202

203

206

209

#### **THIN NOSE COMBINATION PLIER**

Designed with a slim nose to reach into tight places. Has two jaw-opening adjustments and a shear-type wire cutter. A handy plier for all automobile owners and mechanics. Made in two popular sizes.

Item No.	Length	Weight
201	5"	.25 Lb.
202	6"	.35 Lb.

#### **THIN BENT NOSE COMBINATION PLIER**

Made with a 30° offset thin nose which reaches into many places inaccessible with straight nose pliers. Handy for pulling small nails and staples. Especially useful around the home. Has two jaw-opening adjustments and a wire cutter of the shear type.

Item No.	Length	Weight
203	7"	.43 Lb.

#### **BOX JOINT DIAGONAL CUTTING PLIER**

Thin, narrow jaws work easily in congested places. Honed cutting edges are perfectly matched, and withstand hard usage. A useful plier for switchboard, telephone, ignition and other electrical work.

Item No.	Length	Weight
206	6"	.37 Lb.

#### **HEAVY-DUTY DIAGONAL CUTTING PLIER**

A powerful cutting plier, designed with the box joint close to the short jaws to provide great leverage. Cuts heavy wire with little effort. Honed cutting edges are perfectly matched. Every mechanic needs this plier.

Item No.	Length	Weight
209	7"	.49 Lb.

**THE PLOMB LINE IS THE LEADING LINE OF FORGED HAND TOOLS**

## A pair of long-handled pliers with a curved, serrated jaw. The handle is dark and has 'FISHB' and 'U.S.A.' engraved on it. The pliers are shown in a slightly open position.

# *Streamlined Tools* **PLOMB PLIERS**

241

## LIGHT-DUTY WATER PUMP PLIER

Similar to the No. 240 plier but lighter and with five jaw-opening adjustments. Teeth are shaped as in a pipe wrench, insuring positive grip on round objects. Only 9/32" thick, but very strong.

Item No.	Length	Weight
241	9 1/2"	.58 lb.

246

## COMBINATION SLIP JOINT SIDE CUTTING PLIER

A well-made plier that cuts most wire and nails with ease. Has two jaw-opening adjustments.

Item No.	Length	Weight
246	6"	.49 lb.

257

## HEAVY-DUTY UNIVERSAL PLIER

A husky plier, popular because of its outstanding design. One jaw is curved, giving a firm grip on objects of almost any shape. Other jaw is grooved for gripping wire or any round surface. Has a shear-type wire cutter and two jaw-opening adjustments. For professional or home use.

Item No.	Length	Weight
257	7"	.58 lb.

258

## GAS PLIER

Exceptionally popular with refrigeration and diesel mechanics, and all others working with studs, tubing and small pipe. Two ranges of tube sizes are handled by the arrangement of teeth. Even the jaw ends have lengthwise teeth for gripping tubes.

Item No.	Length	Weight
258	8"	.75 lb.

260

## LONG THIN NOSE TELEPHONE PLIER

Popular for telephone work and for radio installation and repair. The long thin nose gets into tight places. Has a powerful shear-type wire cutter.

Item No.	Length	Weight
260	6"	.25 lb.

266-268

## LINEMAN'S HEAVY-DUTY SIDE CUTTING PLIER

Designed for utility linemen's work but used also for wiring, and for installation and maintenance of electrical equipment. Useful, too, around filling stations and garages. The sharp edges withstand hard usage. A tough, smooth-working plier, in two sizes.

Item No.	Length	Weight
266	6"	.43 lb.
268	8"	.81 lb.

275-280

## COMBINATION SLIP JOINT PLIER

A well-designed, high-quality plier at a low price. A leader for general utility, design and service. Has two jaw-opening adjustments and a shear-type wire cutter. Made in four sizes.

Item No.	Length	Weight
275	5"	.26 lb.
276	6"	.41 lb.
278	8"	.58 lb.
280	10"	1.00 lb.

**THE PLOMB LINE IS THE SAFE LINE FOR ALL MECHANICS**

63B

## PLOMB ADJUSTABLE 22½° ANGLE WRENCHES

Five sizes with full polish and seven sizes with semi polish are offered. A cost saver for users is the 16" wrench which performs every job required of usual 15" and 18" wrenches. While its capacity is equal to that of an 18" wrench, it is nearly as light as a 15" wrench. Another cost saver is the 20" wrench which will do the work of conventional 18" and 24" wrenches.

All Plomb adjustable wrenches are forged from alloy steel. Although strong to do the job, they are thin and light to permit faster work.

An outstanding design feature is the absence of a lip on the inner side of the lower jaw, allowing a square nut to fit flat against the inside of the jaw. This larger available surface for holding a nut results in greater strength, better adaptability to different size nuts, and elimination of "knuckle busting" due to slippage. Another plus value is a 12-point, accurately broached box opening in the end of the handle — useful for turning nuts and hanging up the wrench. Each size wrench has a different box opening, plainly marked.

Item No.	Length	Maximum Opening	Thickness of Head at Thickest Point	Thickness at Tip of Jaw	Polish	Weight
704	4"	1/2"	5/16"	9/64"	Full	.08 Lb.
704S	4"	1/2"	5/16"	9/64"	Semi	.08 Lb.
706	6"	3/4"	13/32"	7/32"	Full	.25 Lb.
706S	6"	3/4"	13/32"	7/32"	Semi	.25 Lb.
708	8"	15/16"	15/32"	1/4"	Full	.53 Lb.
708S	8"	15/16"	15/32"	1/4"	Semi	.53 Lb.
710	10"	1 1/8"	9/16"	3/8"	Full	.91 Lb.
710S	10"	1 1/8"	9/16"	3/8"	Semi	.91 Lb.
712	12"	1 5/16"	3/4"	17/32"	Full	1.61 Lb.
712S	12"	1 5/16"	3/4"	17/32"	Semi	1.61 Lb.
716S	16"	1 7/8"	15/16"	19/32"	Semi	3.6 Lb.
720S	20"	2 1/2"	1 5/32"	3/4"	Semi	6.0 Lb.

## PLOMB STILLSON-PATTERN PIPE WRENCHES

These all-steel handle pipe wrenches are the finest made. Extra strong, they stand up under the hardest use. The present design is the result of constant mechanical improvement. Deep milled teeth insure a positive grip on pipe. The easy turning nut permits fast adjustment. Made in six sizes.

Item No.	Length	Maximum Opening	Weight
806	6"	1/2"	.31 Lb.
808	8"	3/4"	.69 Lb.
810	10"	1"	1.50 Lb.
814	14"	1-1/2"	2.8 Lb.
818	18"	2"	4.0 Lb.
824	24"	2-1/2"	7.2 Lb.

There are so few occasions when replacement parts are needed for Plomb pliers, adjustable wrenches and pipe wrenches that we do not recommend stocking of these parts by Plomb Distributors and Jobbers. Any user who may wish a new part should write to the J. P. Danielson Division, Plomb Tool Company, Jamestown, N.Y.

**THE PLOMB LINE IS THE MODERN LINE OF FINE HAND TOOLS**

The image displays three views of a screwdriver, labeled A, B, and C. View A shows the top of the handle with the brand name 'PLOMB' and a logo. View B shows the side of the handle with the text 'PLUMB U.S.A.' and a logo. View C shows the bottom of the handle with the brand name 'PLOMB' and a logo. The handle is made of a polished metal, likely chrome, and has a hexagonal shape. The shaft is also made of metal and has a hexagonal shape. The tip of the screwdriver is flat and wide.

**C** A companion to the Round Blade at a price that will astound you. It has the 4 fluted Handle which is a non-conductor of electricity. The full heat-treated blade will give you perfect satisfaction under the hardest of use.

No.	Length Blade	Overall Length	Diam. Shank	Width Bit

9843	10"	14 1/2"	5/16" "	11/32"

Screwdriver sets, see following page

## **Short Screw Drivers**

### **No. 9651**

Blade 1" long, 9/32" bit; 2 7/8" overall length. Moulded plastic handle.

### **No. 9652**

1 1/2" blade, 9/32" bit, 3 7/8" overall length. Moulded plastic handle.

### **No. 100—Key Ring Screw Driver**

Hand-forged, individually heat-treated. 2 1/4" long.

### **No. 9752 Wood Handle**

Blade 1 3/4" long, with handle 4 1/4" long, 1-3/16" octagon. 5/16" square shank, with 11/32" bit.

THE PLOMB LINE IS THE SPEED LINE FOR SAVING TIME

## SPECIAL-PURPOSE TOOLS

### No. 2006—Brake Adjusting Tool

  
Star nut adjusting wrench for two-shoe Bendix brakes. Length, 8½".

### No. 2301—Muffler Removal Tool

A practical tool for removing mufflers and tailpipes. Easy and safe to use. Makes quick work of taking off old mufflers that are corroded, burned and hard to get at. Forged from electric-furnace chisel steel.

### No. 4041—Battery Terminal Puller

Works on any battery, any terminal, anywhere. It removes a terminal quickly and easily, even if badly corroded. A turn of the handle clamps the jaws and lifts the terminal. Jaws close only enough to grip firmly and do not dig into the post. This puller can be used for several other jobs.

### No. 4050—Pinion Puller

Designed for pulling GM pinions, but can be used for many other pulling jobs. Three sizes of fulcrum plugs are provided, thus eliminating any leverage problems. A solid tool, easy and safe to use.

### No. 4080—Blind Bearing Puller

For pulling Chevrolet, Ford and Packard pilot bearings, but has many other uses. A simple, efficient puller with only two parts. Has an exceptional range of expansion. Can be used alone or with a Plomb Slide Hammer Puller No. 4056.

### No. 5405—Spring Tester

This tester with a torque wrench measures the recoil pressures of valve and clutch springs compressed to any predetermined length. It provides a fast, accurate means for inspecting coil springs up to 7" in length and 2½" in diameter. It also provides a rapid method for matching sets of springs—to increase the power and over-all efficiency of engines. The 5405 is compactly designed, competently engineered and accurately constructed. It is built for lifetime service with no fragile mechanisms, and it is guaranteed permanently accurate.

### No. 6509—V8 Valve Guide Punch

Knocks out the split valve guides easily and quickly.

### No. 6545—Ford Drag Link and Shock Arm Tool

Tapered fork of slim design is readily inserted to separate the shock links and tie rods. A real time saver. Has knurled handle. Length, 16".

### No. 6601 Starter Wrench

For Plymouth, Dodge, Chrysler and De Soto cars. Clears obstructions when removing or replacing starter. Has 5/8" opening.

**THE PLOMB LINE IS THE MODERN LINE OF FINE HAND TOOLS**

## Small Pullers

### Fast and Easy to Use on the Little Pulling Jobs

The size and range of both 4060 and 4070 are the same.

Short jaws have range from 0" to 3" long jaws from 3" to 4". With No. 4056N, nut used on Slide Hammer Puller, short jaws can be reversed and used for inside pulling.

These two small pullers are designed to pull the little gears, pulleys, bearings quickly and easily. The narrow jaws get into very close places. Adjusting nut holds jaws firmly in position so they can't slip off. Any convenient wrench can be used on the 5/8" square head of screw.

## Parts Specifications

# Plomb Universal Wheel Puller

## Handles Practically All Types of Wheels with 3, 4, 5, 6 and 7 Studs

This is the simplest and fastest wheel puller made. It pulls wheels of practically every car. Legs shown are quickly adjustable to any drum with 3, 4, 5, 6 or 7 studs, in a circle up to 6½" diameter. With No. 4001JT Legs, it is adaptable to any drum with studs in a circle up to 8". Regular legs are drilled to take up to 9/16" studs; 4001JT legs will take up to ¾" studs.

### 4001T—Metal Box for Wheel Puller

Box, illustrated below is made of heavy-gauge sheet steel and the No. 4001 Wheel Puller fits into it as shown, 1½" deep, 8¼" wide, 8½" long. Three compartments.

No. 4001A—Wheel Puller  
in Metal Box.

## FINEST DOLLY BLOCKS

### 1452 EGG-SHAPED DOLLY.

A very popular shape, with many different curves and radii. 1 5/8" thick, 2 1/2" wide, 3 3/4" lg. Wt. 2 3/4 lbs.

### 1453 RAILROAD OR GENERAL PURPOSE DOLLY.

A large variety of radii are provided in this dolly, with perfect hand fit. Heavy weight for bumping out dents, thin beading edge and 7 1/2 square inches of working area on the large face are responsible for its popularity. Weight 3 pounds.

### 1454 RADIUS DOLLY.

A useful design that has many radii. Bottom and one side flat, forming a right angle. 1 1/2" thick, 2 3/16" wide, 4 1/2" lg. Wt. 2 lbs. 10 oz.

### 1455 NEW BEAD DOLLY.

Use for beads or rolled fenders. Start with wedge end and finish with curved top. The flat side can be worked under long curve of fender. Thin edge useful for corners and beading. Comfortable hand grip. 4 3/8" long, 2 3/4" wide, 1 7/8" thick at top. Wt. 2 1/2 lbs.

### 1457 SHRINKING DOLLY.

The unique shape, low crowned surface of this dolly gives it an all-purpose use where shrinking of body metal is concerned. Excellent also for raising beads and moulding. Wt. 2 1/4 lbs.

### 1458 HEEL DOLLY, SEMI-ELLIPTICAL.

This dolly provides two flat and two crowned working surfaces. Especially useful in restricted places and can be used for shrinking metal. Wt. 2 lbs.

### 1501 STRAIGHT FLEXIBLE PLOMB FILE.

New, quick-cutting type with curved teeth. Finest quality you can buy. 1 3/8" wide, 14" long.

### 1509 ADJUSTABLE FILE HOLDER.

Made of aluminum, this fender file holder is light but strong. A file can be left straight or be made concave or convex with the simple turnbuckle adjuster.
